Sound Level Meter for Building Acoustic & Environmental Noise Measurement

January, 2013

LARSON DAVIS (A PCB PIEZOTRONICS DIV) - Inc is uniquely positioned in Acoustics industry to satisfy a wide range of applications in research, test, measurement and monitoring in Acoustics field of applications.

Structural Solutions Private Limited, the exclusive representative of PCB group in India is a professional engineering company engaged in offering high-end technology intensive products and system solutions to Indian industry for automotive applications.

Applications:

- Environmental noise assessment and monitoring
- Reverberation time measurement and building acoustics
- Occupational noise evaluation
- Noise reduction validation
- Product quality control
- NVH correlation
- Real-time analysis of sound

Features & Benefits:

- Class 1 integrating sound level meter
- Real-time frequency analysis
- Standard USB interface
- Dynamic range of 120 dB
- Logging of broadband and spectral data to obtain time, measurement and event histories on the instrument
- Sound recording in .wav format
- Utility software included for reporting

Structural Solutions Private Limited
